

In the Claims:

Please delete claims 10-29 without prejudice.

Please amend the claims as follows.

1. (currently amended) A method of providing remote user activity information regarding recently accessed documents of remote users to a local user, comprising:

obtaining, by an awareness client application process executing on a local computer system, from an associated awareness server application process executing on a server computer system, an online status of said remote computer system user;

~~displaying~~presenting, by said awareness client application process, within a user interface displayed on said local computer system, an awareness display object associated with said remote computer system user, wherein said awareness display object ~~displays~~includes an identity indication of said remote computer system user, wherein said awareness display object further includes a visual ~~an~~ indication of said online status of said remote computer system user;

obtaining, by said awareness client application process on said local computer system, responsive to said ~~displaying~~presenting said awareness display object associated with said remote computer system user, document access activity information regarding said remote computer system user, wherein said document access activity information includes the identity of a plurality of documents~~at least one document~~ accessed by said remote computer system user;

displaying, by said awareness client application process, a special icon in said user interface displayed on said local computer system;

detecting a selection of said awareness display object associated with said remote computer user and said special icon by said local computer system user; and

~~displaying~~presenting, by said awareness client application process, in response to said detecting said selection of said awareness display object associated with said remote computer system user and said special icon by said local computer system user, said document access activity information regarding said remote computer system user in said user interface displayed on a display for said local computer system.

2. (currently amended) The method of claim 1, wherein said document access activity information regarding said remote computer system user further comprises ~~a-times~~ at which each of said plurality of documents ~~at least one document~~ was accessed by said remote computer system user.

3. (currently amended) The method of claim 2, wherein said document access activity information further comprises ~~a-numbers~~ of keystrokes and mouse clicks used by said remote computer system user to access each of said plurality of documents ~~at least one document~~.

4. (currently amended) The method of claim 3, wherein said document access activity information further comprises ~~a-names of an-application programs~~ used by said remote computer system user to access said plurality of documents ~~at least one document~~.

5. (currently amended) The method of claim 4, wherein said document access activity information further comprises actions performed during ~~a~~document accesses by ~~said~~the remote computer system user.

6. (original) The method of claim 3, wherein said presenting said document access activity information comprises presenting said document activity information in at least one pop-up display window.

7. (currently amended) The method of claim 1, further comprising:

presenting an interface to ~~user of~~ said local computer system user, wherein said interface enables ~~said user of~~ said local computer system user to indicate whether any document access activity information regarding said ~~user of said~~ local computer system user is to be shared with other users.

8. (currently amended) The method of claim 1, further comprising:

presenting an interface to ~~said user of~~ said local computer system user, wherein said interface enables said ~~user of said~~ local computer system user to specify document access activity information regarding said ~~user of said~~ local computer system user that is to be shared with other users.

9. (currently amended) The method of claim 1, further comprising:

presenting an interface to said ~~user of said~~ local computer system user, wherein said interface enables said ~~user of said~~ local computer system user to specify one or more other users

with which document access activity information regarding said local computer system user is to be shared.
